

**DIGIJAKS GROUP**  
CRISIS SECURITY

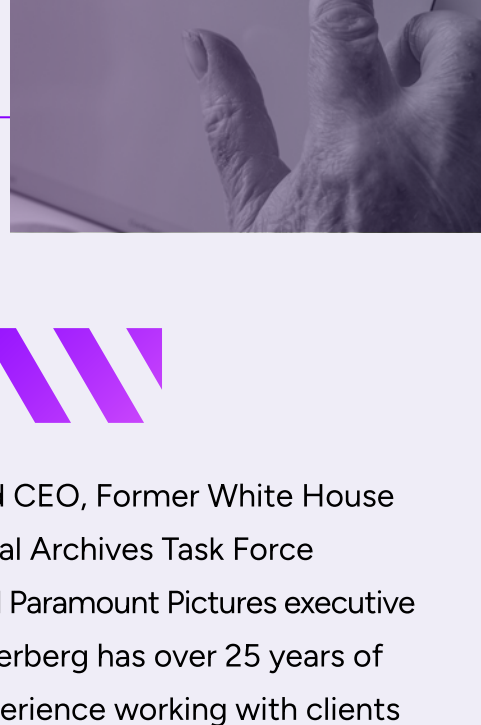

## Financial-Grade Cyber Security Solutions

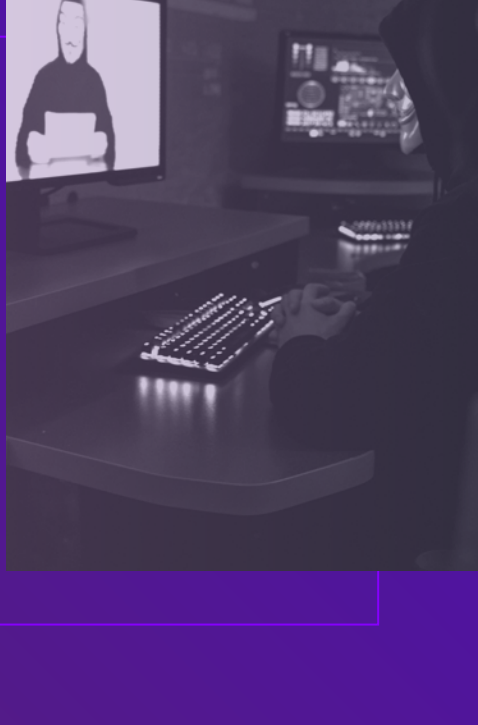

### Access the Highest Level of **Cyber Security & Reputation Management**

**Digijaks Group** is a **cybersecurity rapid response firm** that combines **proprietary time-proven trade secrets with the power of artificial intelligence and human subject matter experts** from intelligence agency backgrounds.

Trusted by Fortune 100 corporations, governments, CEOs, politicians and famous entertainers, Digijaks offers proven solutions for high-impact individuals, brands and organizations to deal with any combination of cyber issues and digital reputation management and control.

Founder and CEO, Former White House aide, National Archives Task Force member and Paramount Pictures executive Alan W. Silberberg has over 25 years of security experience working with clients like Microsoft, Revlon and the US Small Business Administration.

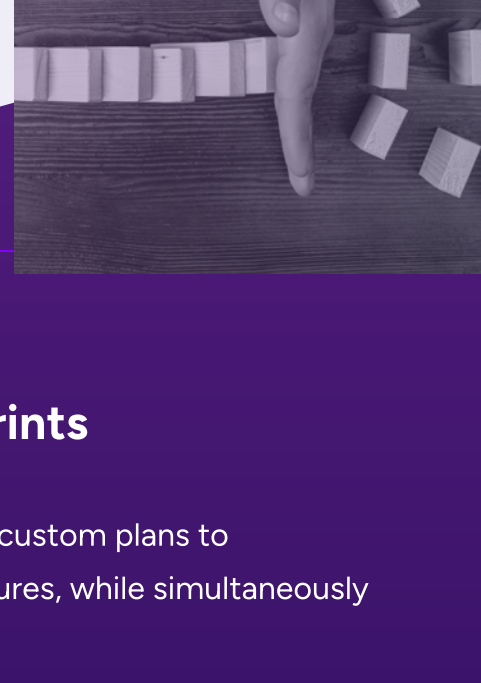

### Don't Assume You're Safe – Ensure It

Whether you're a trusted advisor or a principal, the fact that you haven't experienced a targeted attack yet, doesn't mean you're not at risk. From cybercrime cartels seeking to extort money to bad actors who want to physically harm you, even the most security-conscious people are constantly at risk. When one of these attacks happens to you, do you know who to call?

Don't become yet another victim of professional digital hijackers. Protect yourself, your reputation and your loved ones at all times with the Digijaks Group.

Armed with the same tools and tactics employed by the most secure financial institutions, the Digijaks rapid response team delivers comprehensive solutions to eliminate threats, ensure your security and manage your reputation during a crisis. Proprietary artificial intelligence technology and in-the-field experience allows us to identify and neutralize any threat.

### Risk Assessment & Preventative Blueprints

No two attacks are the same, which is why Digijaks creates custom plans to determine your risk level and implement preventative measures, while simultaneously managing any type of attack, including:

- ! Compromised financial, business, web, or social accounts/emails
- ! Negative media coverage on page one of Google and other search engines
- ! Both cyber security and reputation attack often hide a secondary more lethal form of attack
- ! Spammers attacks on social media channels
- ! Lawsuits and defamation of character allegations
- ! Smear campaigns on websites or social platforms
- ! Personal misinformation about an executive or business
- ! Social engineering attacks aimed at financial companies
- ! Digital and physical crossover attacks, where something begins online and turns into a physical threat, i.e., compromised business email, online attention from stalkers and trolls, targeted celebrity attacks and illicit Air Tags and GPS devices used to track movement
- ! Deep fake, AI, AR, and VR technologies used to create alternate realities intended to harm

### Your Trusted Digital Fortress and **Real-World Protectors**

People rarely talk about the negative side of success – namely, the unwanted attention it attracts. The truth is the higher your profile, the more lucrative of a target you become. Digijaks provides all-encompassing digital and real-world security services with threat remediation for celebrities, ultra high net worth individuals, executives and anyone else who needs it.

### The Proven Way to Mitigate Your Reputation & Cybersecurity Risks

Don't risk damage to your organization's reputation, your wealth portfolio or your person. Digijaks provides world-class security services for any need. Whether you're in the midst of a crisis or are seeking to take a proactive approach to protection, we have the best-in-class solution you need.

High-profile individuals and trusted advisors representing the well-being of their clients turn to Digijaks when they are at their most vulnerable. They trust us when they're experiencing an attack for one reason: we get verified results. Using former intelligence agency and military professionals, we have successfully remediated some of the highest profile data breaches and security hacks in the world. Advanced military grade security combined with AI and subject matter experts with best-in-class suite of solutions allow us to quickly track, protect and counter cybercriminals and eliminate threats.

### A Record that **Speaks for Itself**

### Tailored Security Solutions for Your Needs

While criminals tend to follow familiar patterns, every individual's security needs are unique. Our Cybersecurity & Reputation Management experts will determine exactly where you or your client are vulnerable, then design and execute on solutions to keep you safe.

Digijaks is for:

#### ULTRA-HIGH-NET-WORTH INDIVIDUALS AND THEIR FAMILIES

Don't let blackmailers, ransomware and bad actors extort money from you. Digijaks uses preventative technology to keep you, your family and your data safe.

#### HIGH-LEVEL EXECUTIVES

Reputational damage can send stock prices plummeting. We know how to block and reverse negative publicity and personal attacks.

#### POLITICAL FIGURES

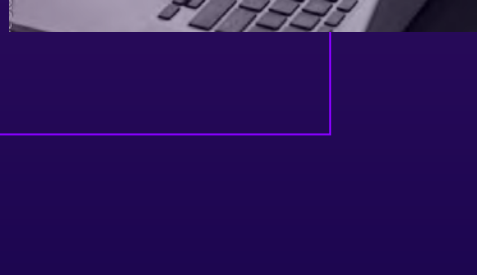

Hostile foreign nations, hackers and spies have a vested interest in compromising political figures. Digijaks knows their tricks and how to counter them.

#### CELEBRITIES AND PUBLIC PERSONALITIES

From obsessed fans to paparazzi, individuals in the public eye are constantly at risk. We use the latest technologies to minimize your threat level and keep you safe.
